Student Information System

Introduction:

A student information system is a software application designed to manage and organize student data in educational institutions. It helps educational institutions to help keep track of various information on students. In this report, we'll be developing a student information system which will meet the needs of various stakeholders including students, teachers and university administrators. We'll briefly describe the functionalities and features of this project below.

Methodology:

The project is a result of the combined effort of a team. The team was divided into segments where each segment focused on specific features. A combination of programming languages such as HTML, CSS and PHP were used to develop the system. The system was tested to ensure that it is user-friendly and efficient.

Features & Advantages of the Project:

- **Student Profile Management:**
The system will allow to create and manage student profiles, including personal information, contact information.
- **Reporting and analysis from database by performing SQL queries:**
As the admin will have access to the database, a variety of queries can be performed to gather particular data from the database. For example, collecting information about students of a particular department who are allotted to a particular hall.

This Application can greatly reduce the time and cost of users compared to any traditional administrative systems. Students can Upload and check their informations in a flash which will help them focus on their studies. Administrators can also efficiently gather data from the database instead of going through dusty files. This is a step towards streamlining this mundane process.

Project Code:

HTML And CSS:

The image shows a web form titled "Student Information" with a blue header. The form contains several input fields for student data, arranged in a two-column layout. The fields are: Student Name (Taufiq Islam), Student Id (20200650754), Class Roll (384), Batch (49), Session (2019-20), Gender (Male), Department (Computer Science and Engineering), Hall (A F M Kamaluddin Hall), Email (taufiq.stu2019@juniv.edu), Phone Number (01909827757), and Password (cse101). A red "Logout" button is at the bottom. The page footer includes a "Powered by" logo and the text "000webhost".

Fig: Student Information

Conclusion:

Finally, we can conclude that the Student Information System will provide a centralized platform for managing student data that will benefit teachers, students and administrations of a university and as a whole it will improve the efficiency of university operations.
